# SPOTIFY

# CONTENTS

- Abstract
- Introduction
- Objectives and Problem Definition
- System Design
- System Requirements
- Implementation
- Expected Results
- Conclusion

# ABSTRACT

- ❑ A **SPOTIFY** Website using *HTML*, *CSS* and *JavaScript*.
- ❑ **Audio Playback Controls:** Provides familiar audio playback controls, including play, pause, skip, and volume adjustment, replicating the Spotify playback experience.
- ❑ **Smart Recommendations:** Integrates an algorithm-driven recommendation system for suggesting new music based on users' listening history.
- ❑ A website with interactive UI(User Interface)
- ❑ Full functional practical website.

# INTRODUCTION

- This music streaming platform is a vibrant space designed to echo the seamless and personalized experience reminiscent of Spotify, providing users with an immersive and intuitive platform for discovering, creating, and enjoying their favorite tunes.
- Explore a vast and diverse music library that spans across genres, ensuring there's something for every musical taste.
- Immerse yourself in a visually appealing platform, capturing the aesthetic essence of Spotify while offering a customized and engaging interface.
- Join us in this musical adventure where every beat, playlist, and recommendation resonates with the uniqueness of your personal musical taste. Welcome to a world where your journey is as distinctive as the melodies you discover and create.

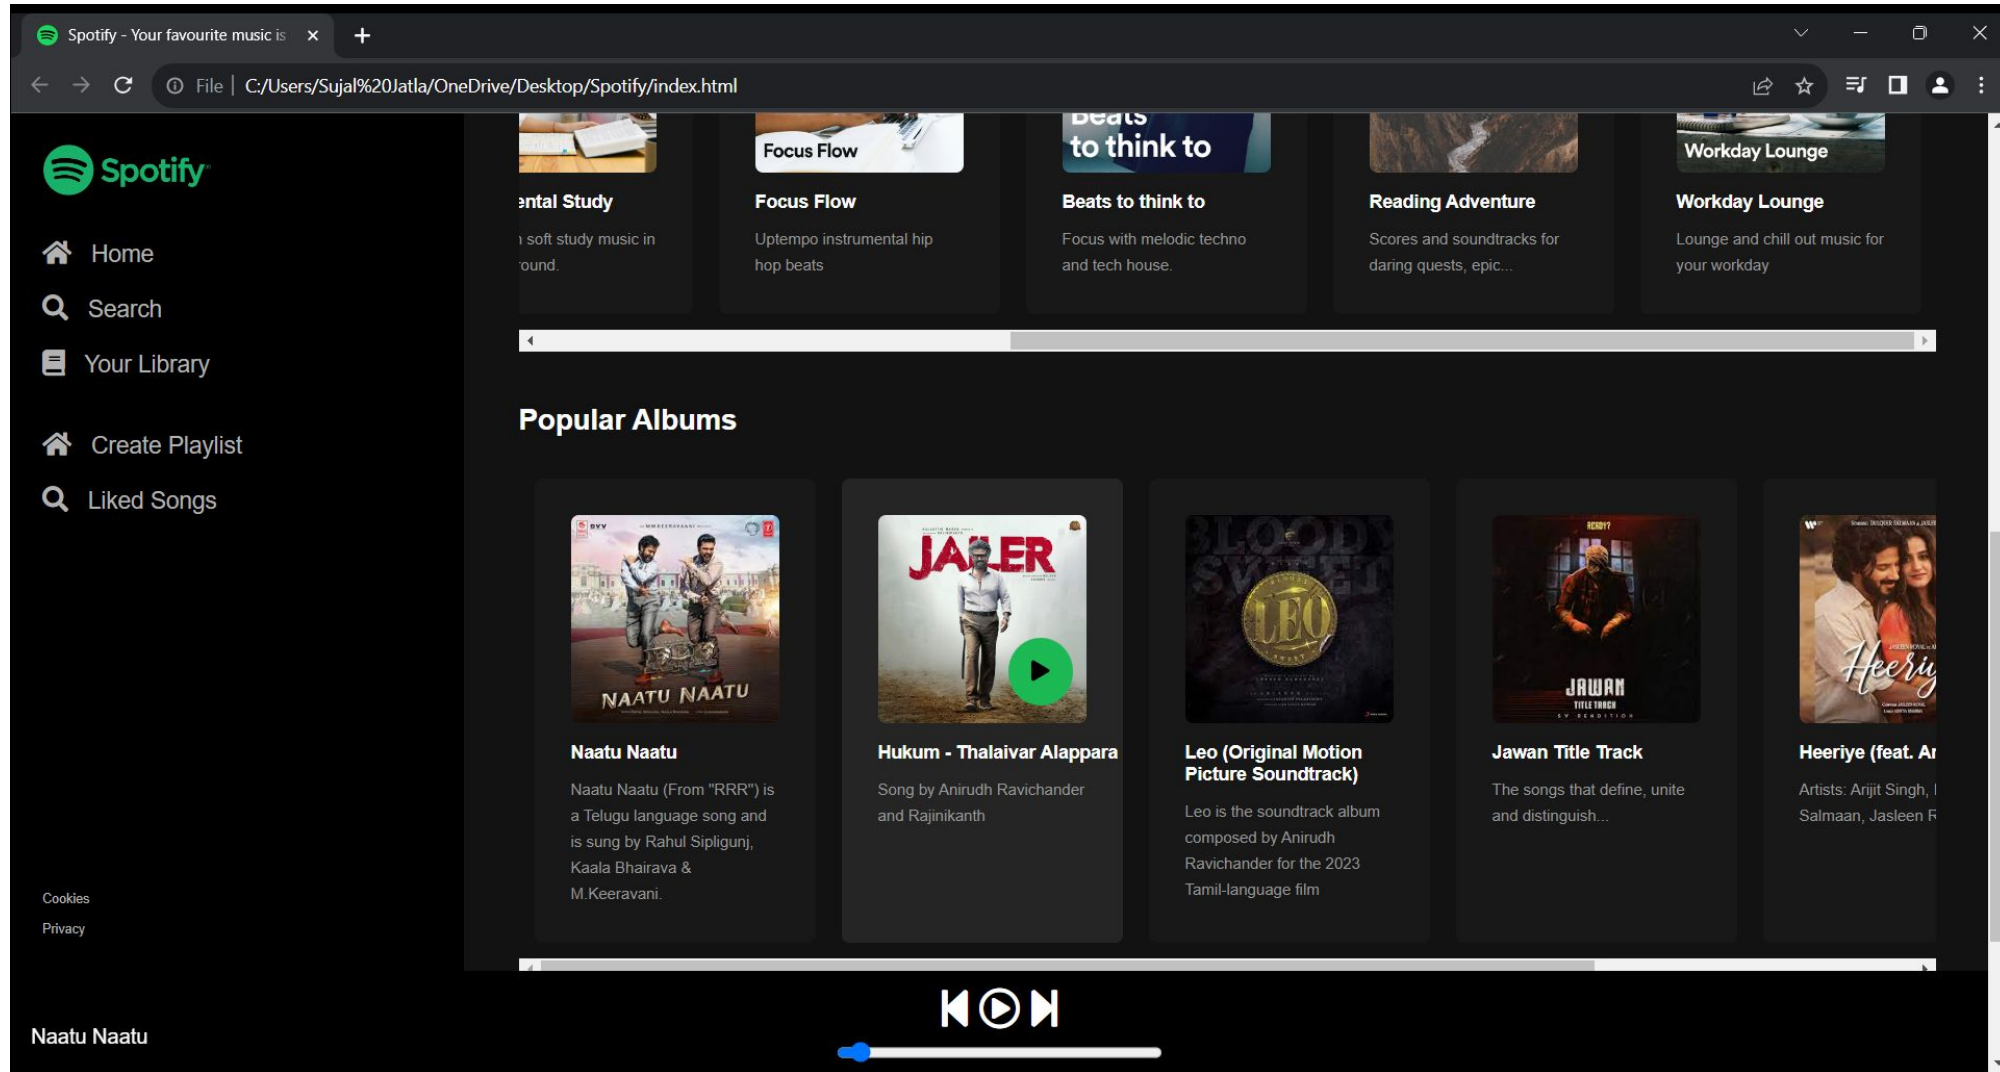

# OBJECTIVES AND PROBLEM DEFINITION

- The objective of our project is to create a music streaming platform that closely replicates the seamless and user-centric experience of Spotify. The existing market lacks a comprehensive solution that combines an extensive and diverse music library with intuitive navigation, smart recommendation systems, and secure user authentication. We aim to bridge this gap by developing a platform that not only mirrors the familiarity of Spotify's design but also introduces innovative features such as social engagement elements, offline listening capabilities.

# SYSTEM DESIGN

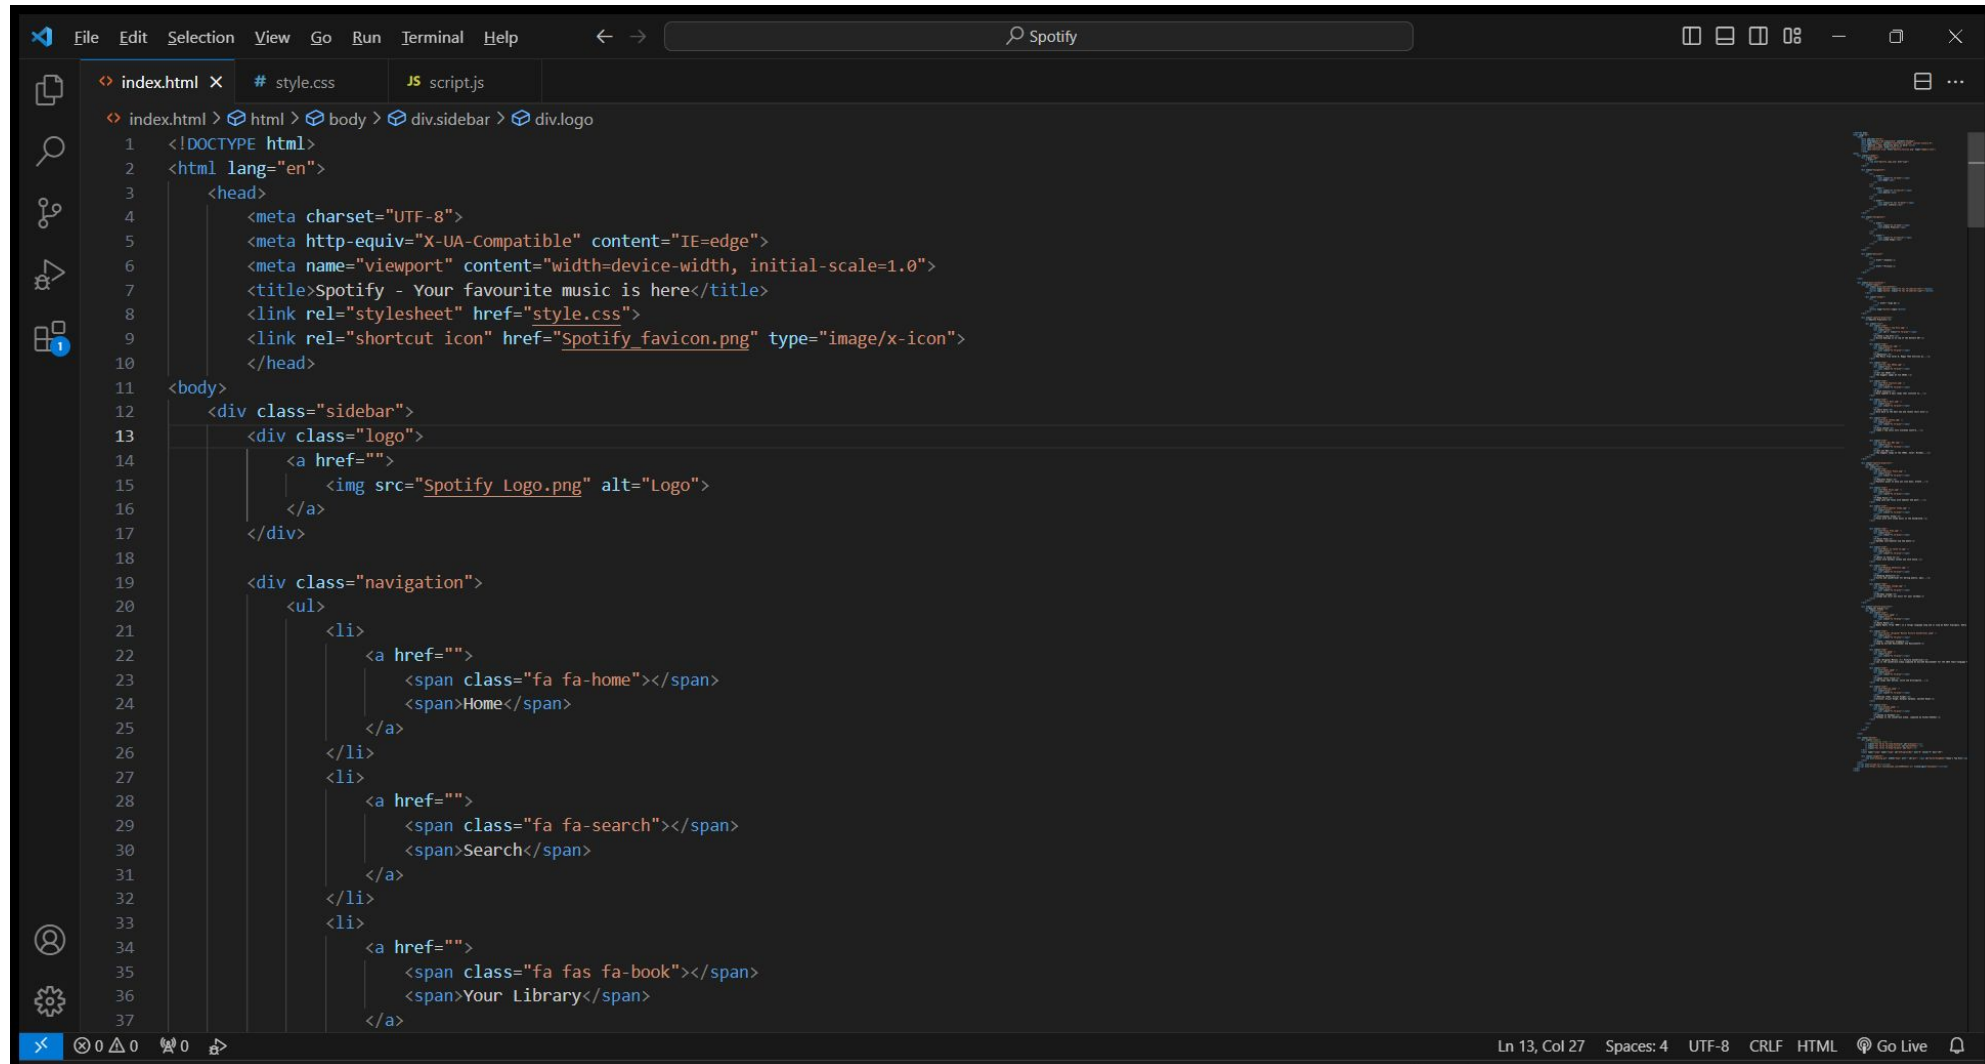

# SYSTEM REQUIREMENTS

- **Platform Compatibility:** Ensure compatibility across major operating systems such as Windows, macOS, iOS, and Android.
- **Internet Connection:** Require a stable internet connection for real-time music streaming and content updates.
- **Browser Support:** Support popular web browsers like Chrome, Firefox, Safari, and Edge for web-based access.

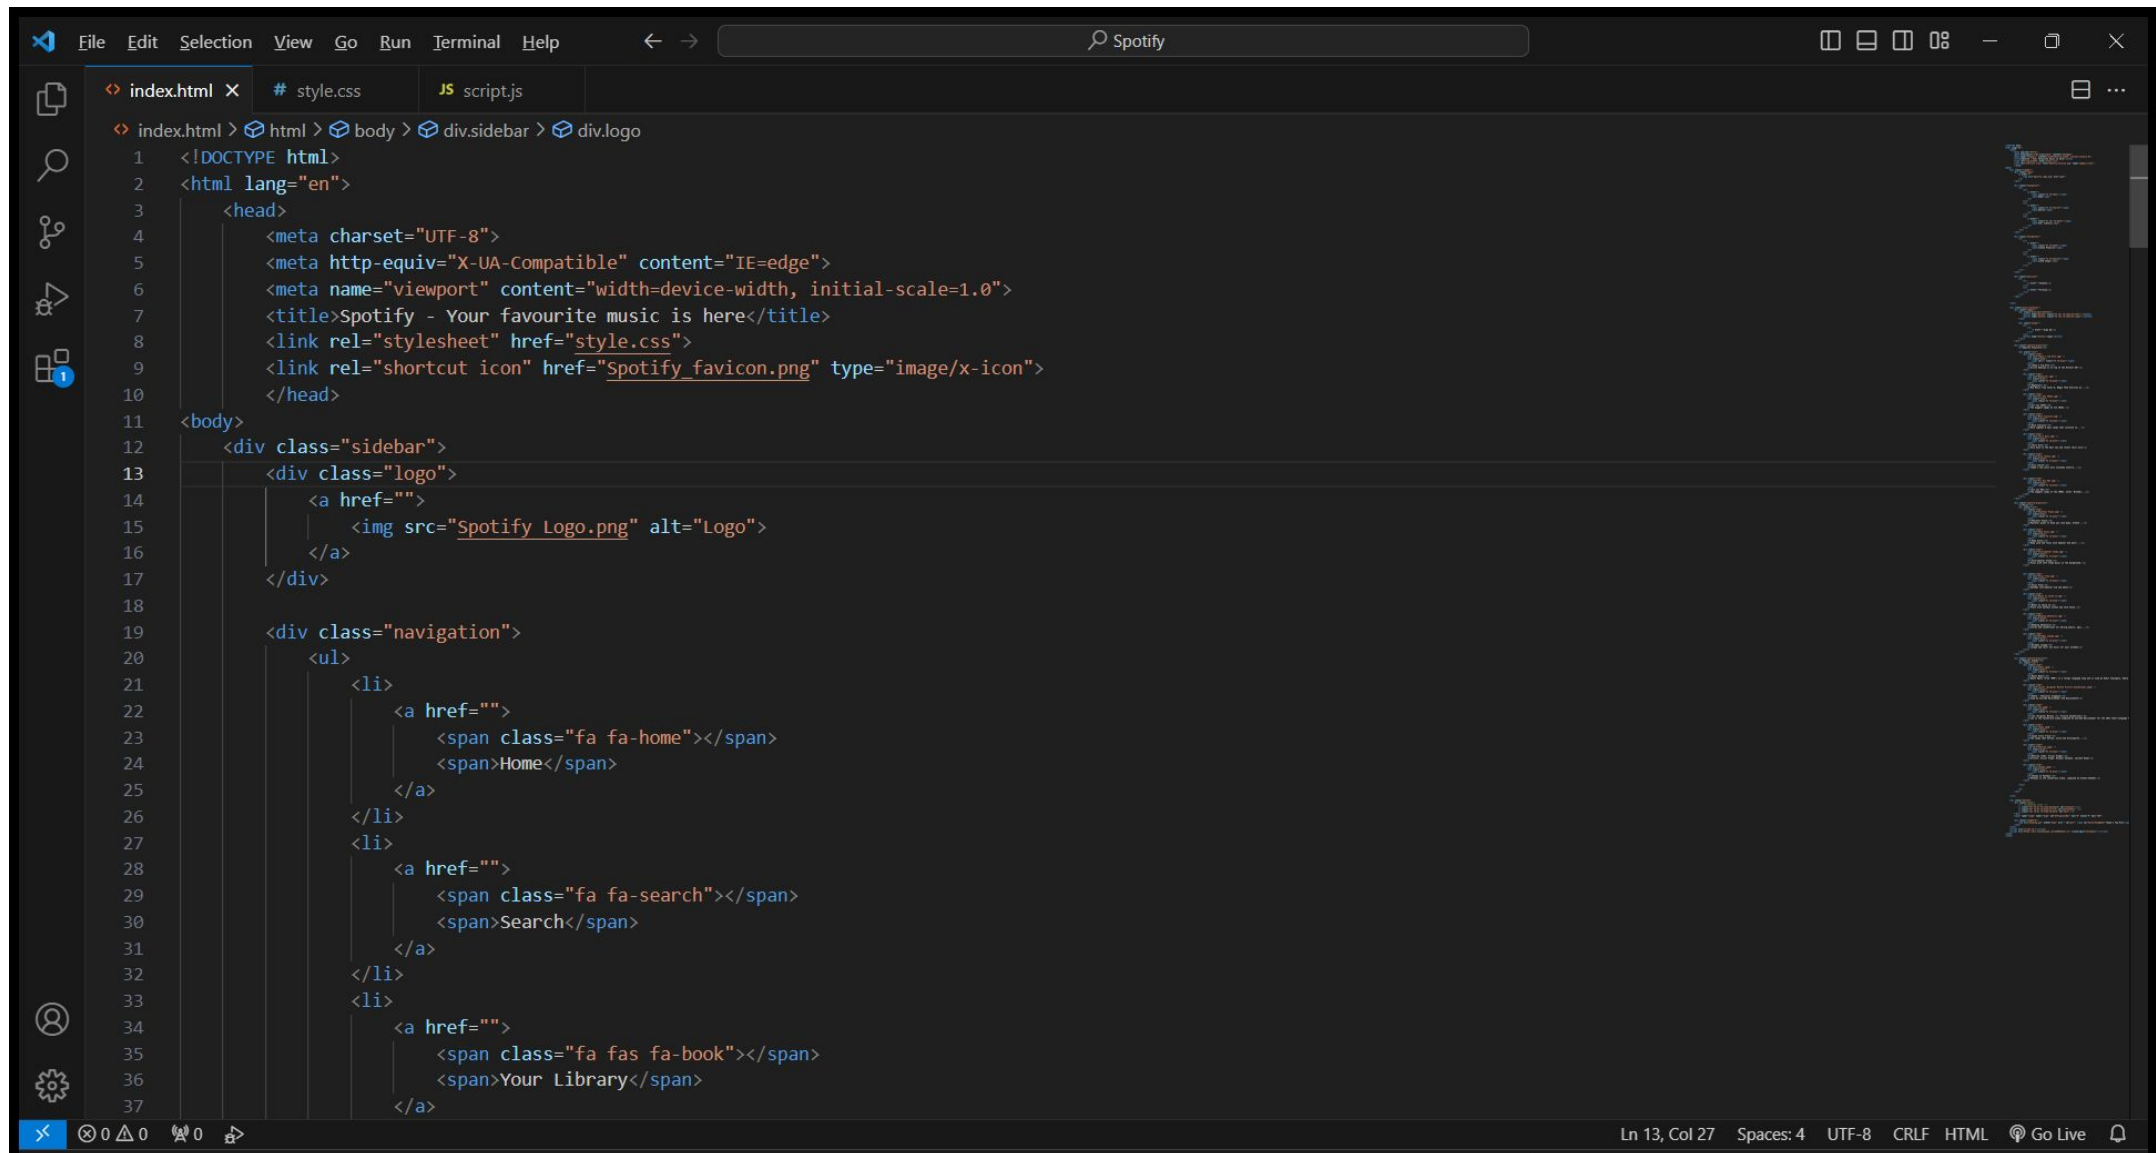

# IMPLEMENTATION

```
index.html x # style.css JS script.js
index.html > html > body > div.sidebar > div.logo
1 <!DOCTYPE html>
2 <html lang="en">
3   <head>
4     <meta charset="UTF-8">
5     <meta http-equiv="X-UA-Compatible" content="IE=edge">
6     <meta name="viewport" content="width=device-width, initial-scale=1.0">
7     <title>Spotify - Your favourite music is here</title>
8     <link rel="stylesheet" href="style.css">
9     <link rel="shortcut icon" href="Spotify_favicon.png" type="image/x-icon">
10  </head>
11  <body>
12    <div class="sidebar">
13      <div class="logo">
14        <a href="">
15          
16        </a>
17      </div>
18      <div class="navigation">
19        <ul>
20          <li>
21            <a href="">
22              <span class="fa fa-home"></span>
23              <span>Home</span>
24            </a>
25          </li>
26          <li>
27            <a href="">
28              <span class="fa fa-search"></span>
29              <span>Search</span>
30            </a>
31          </li>
32          <li>
33            <a href="">
34              <span class="fa fas fa-book"></span>
35              <span>Your Library</span>
36            </a>
37          </li>
38        </ul>
39      </div>
40    </div>
41  </body>
42</html>
```

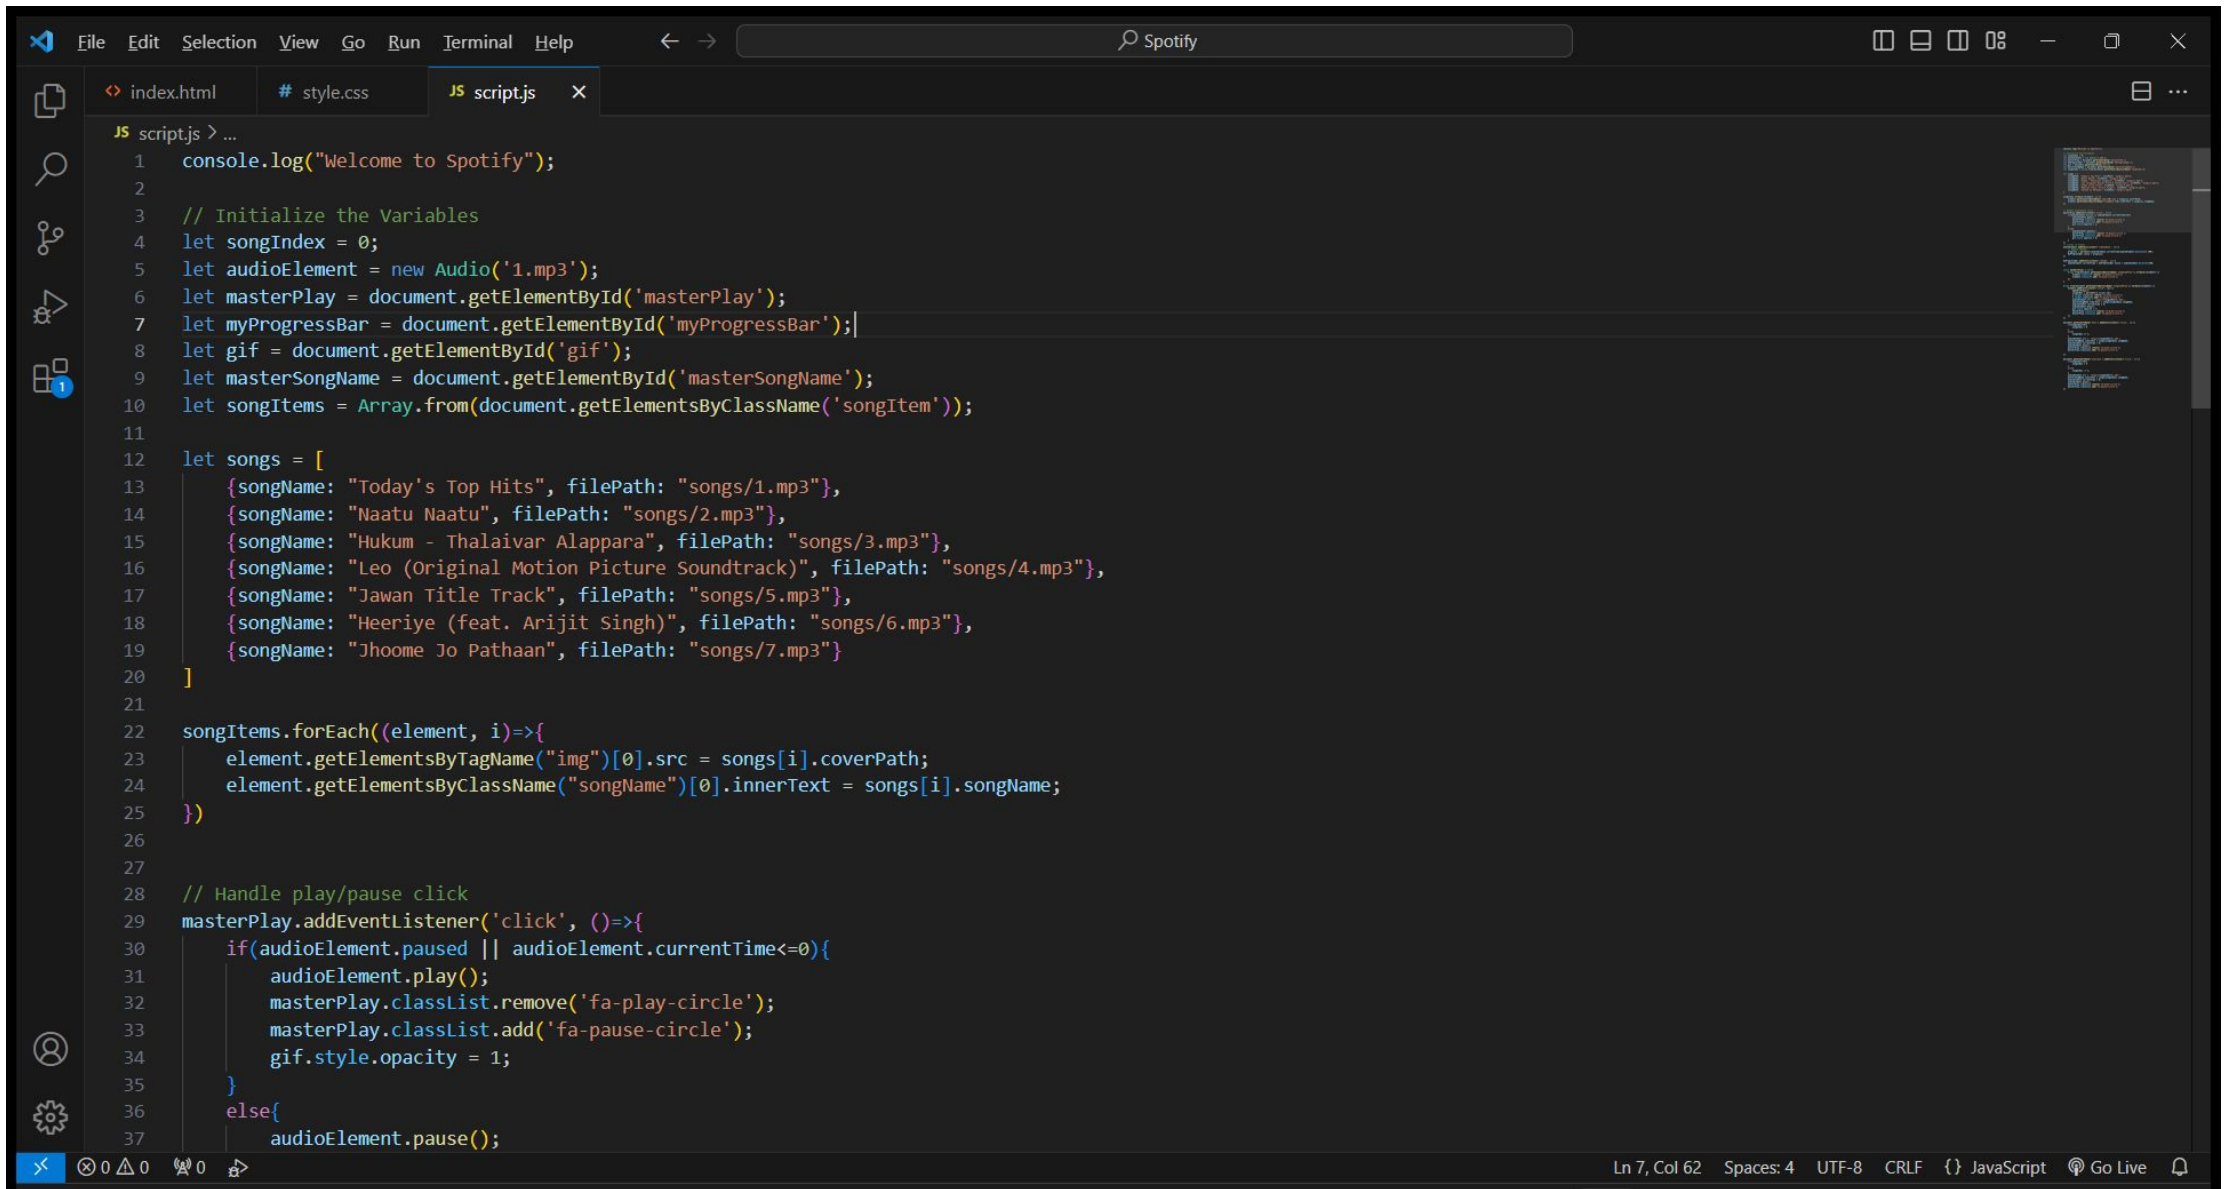

The screenshot shows a code editor with a dark theme. The top menu bar includes File, Edit, Selection, View, Go, Run, Terminal, and Help. A search bar with the text "Spotify" is located on the right. The editor has three tabs: "index.html", "# style.css", and "JS script.js". The "index.html" tab is active, showing the following HTML code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3   <head>
4     <meta charset="UTF-8">
5     <meta http-equiv="X-UA-Compatible" content="IE=edge">
6     <meta name="viewport" content="width=device-width, initial-scale=1.0">
7     <title>Spotify - Your favourite music is here</title>
8     <link rel="stylesheet" href="style.css">
9     <link rel="shortcut icon" href="spotify_favicon.png" type="image/x-icon">
10  </head>
11  <body>
12    <div class="sidebar">
13      <div class="logo">
14        <a href="">
15          
16        </a>
17      </div>
18
19      <div class="navigation">
20        <ul>
21          <li>
22            <a href="">
23              <span class="fa fa-home"></span>
24              <span>Home</span>
25            </a>
26          </li>
27          <li>
28            <a href="">
29              <span class="fa fa-search"></span>
30              <span>Search</span>
31            </a>
32          </li>
33          <li>
34            <a href="">
35              <span class="fa fas fa-book"></span>
36              <span>Your Library</span>
37            </a>

```

The right sidebar shows a preview of the HTML code. The bottom status bar indicates "Ln 13, Col 27", "Spaces: 4", "UTF-8", "CRLF", "HTML", and "Go Live".

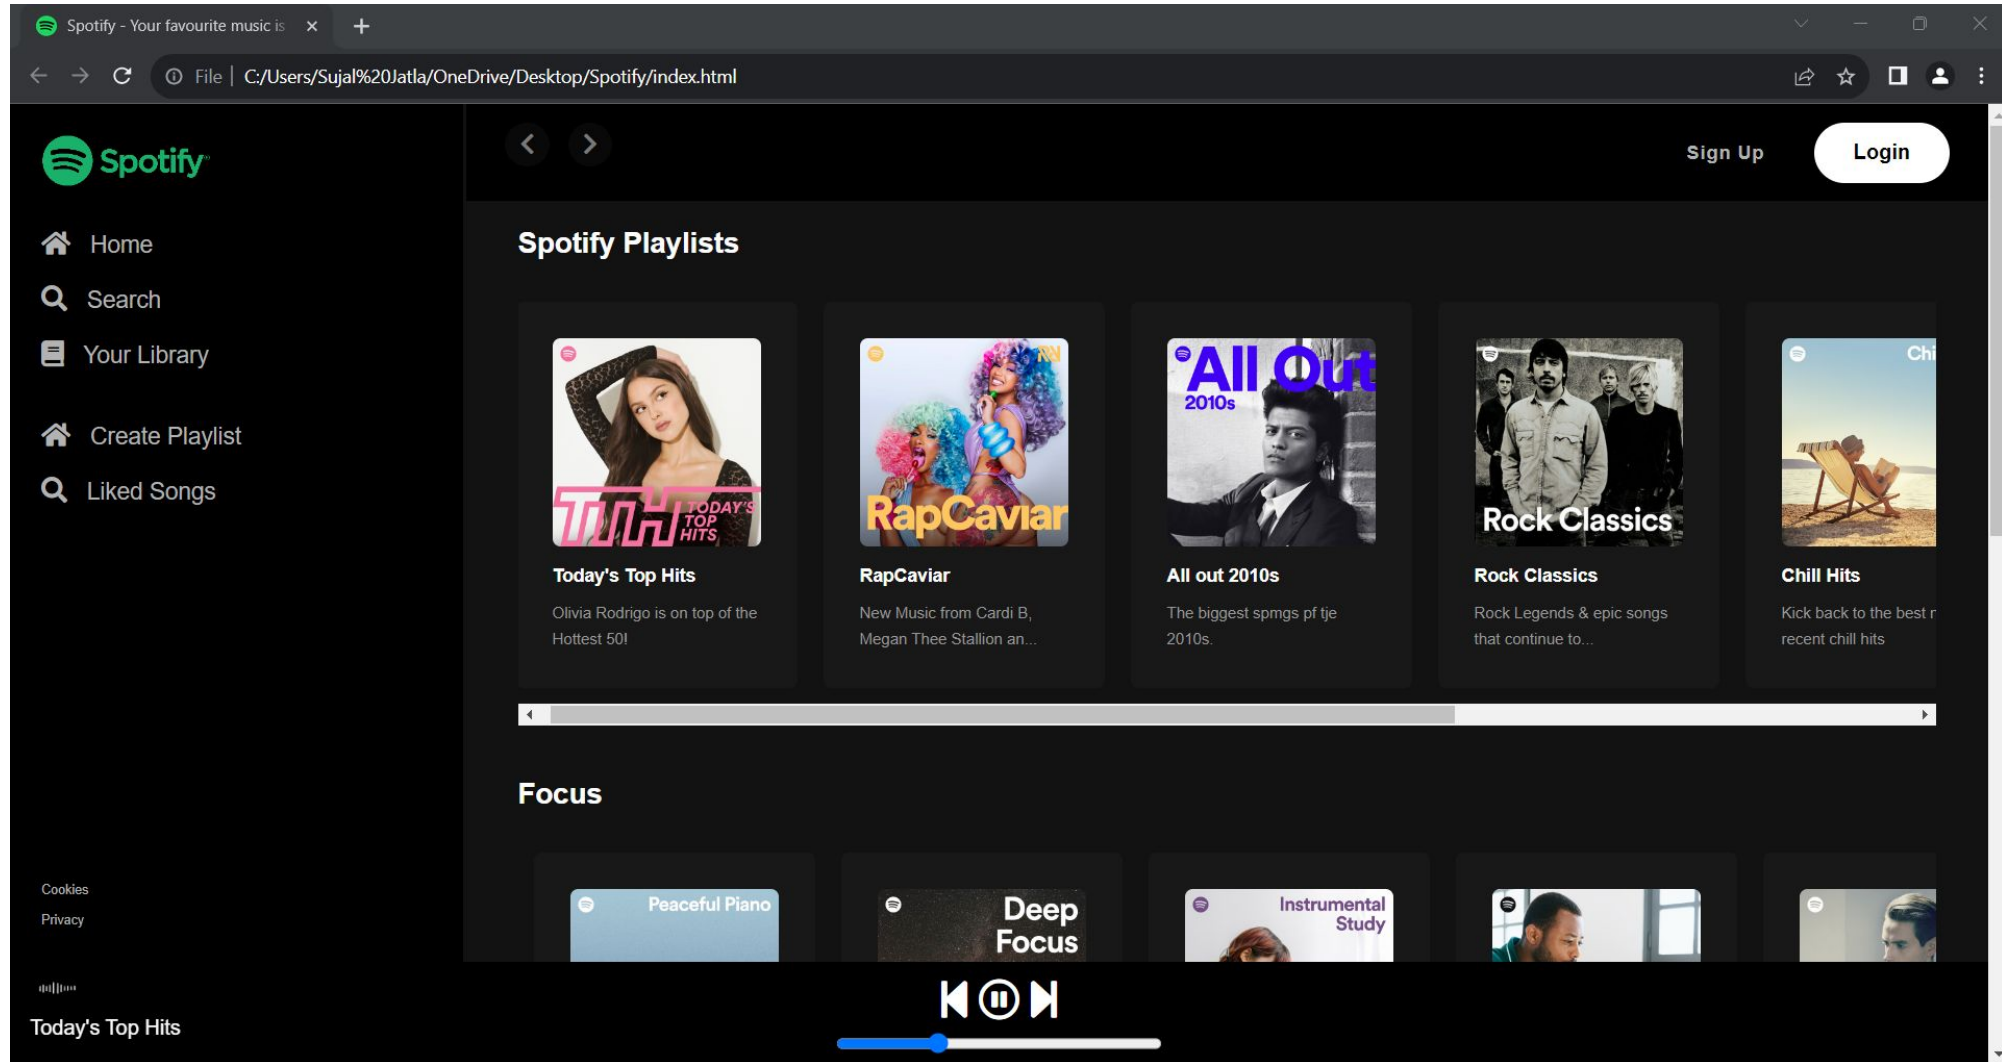

```
JS script.js > ...
1 console.log("Welcome to Spotify");
2
3 // Initialize the Variables
4 let songIndex = 0;
5 let audioElement = new Audio('1.mp3');
6 let masterPlay = document.getElementById('masterPlay');
7 let myProgressBar = document.getElementById('myProgressBar');
8 let gif = document.getElementById('gif');
9 let masterSongName = document.getElementById('masterSongName');
10 let songItems = Array.from(document.getElementsByClassName('songItem'));
11
12 let songs = [
13   {songName: "Today's Top Hits", filePath: "songs/1.mp3"},
14   {songName: "Naatu Naatu", filePath: "songs/2.mp3"},
15   {songName: "Hukum - Thalaivar Alappara", filePath: "songs/3.mp3"},
16   {songName: "Leo (Original Motion Picture Soundtrack)", filePath: "songs/4.mp3"},
17   {songName: "Jawan Title Track", filePath: "songs/5.mp3"},
18   {songName: "Heeriye (feat. Arijit Singh)", filePath: "songs/6.mp3"},
19   {songName: "Jhoom Jo Pathaan", filePath: "songs/7.mp3"}
20 ]
21
22 songItems.forEach((element, i)=>{
23   element.getElementsByTagName("img")[0].src = songs[i].coverPath;
24   element.getElementsByClassName("songName")[0].innerText = songs[i].songName;
25 })
26
27
28 // Handle play/pause click
29 masterPlay.addEventListener('click', ()=>{
30   if(audioElement.paused || audioElement.currentTime<=0){
31     audioElement.play();
32     masterPlay.classList.remove('fa-play-circle');
33     masterPlay.classList.add('fa-pause-circle');
34     gif.style.opacity = 1;
35   }
36   else{
37     audioElement.pause();
```

# EXPECTED RESULTS

# CONCLUSION

The streamlined Spotify clone, focused solely on seamless song playback, offers a minimalist yet efficient music streaming experience. By prioritizing simplicity and ease of use, aiming to provide users with a straightforward platform dedicated solely to the enjoyment of music. Stripped of additional features, this clone maintains the essence of Spotify's functionality, allowing users to effortlessly play their favorite songs without unnecessary complexity. With a commitment to a clean and straightforward design, Spotify clone caters to those who seek a pure and uncomplicated music listening experience.
